Warrnambool District, VIC.
Collecting Calcite and Aragonite Crystals, Terrone
Basalt Quarry, Victoria.**

Les Cowie and Rex Shillibeer.

Collecting Calcite and Aragonite Crystals, Terrone Basalt Quarry, Victoria. 2004. *Continued...*

John X, Les Cowie, Rex Shillibeer, and Brenda Cowie.

Ian has found a nice Aragonite crystal.

**2004 Joint TTGGMC & MGMC Fieldtrip to
Warrnambool District, VIC.
Collecting Olivine bombs (for peridot) and Calcite
Crystals, Mount Shadwell Quarry, Mortlake,
Victoria.**

Quarry staff used their front head loader at Mount Shadwell Quarry, Mortlake, Victoria to loosen olivine bombs (source of peridot) and calcite in the scoria on the hill for fossickers...see dark area below. Calcite had a slight yellow florescence under ultra violet light. Rex Shillibeer (MGMC member – far (R) in the picture above) had the find of the day with a nice, large slab specimen of olivine.
